School Education- Precious years of human life

Dear Parents & Educator,
School education, a span of first 16 years of human life, lay down the path for rest of life. It is designed to lay down the foundation for mental, physical, spiritual, aesthetic And social value system in each child. Education is incomplete if it is restricted gain subject knowledge and marks in exam.

The purpose of Education is described in one sutra of विष्णु पुराण (Viṣṇu Purāṇa) in our mother language Sanskrit- सा विद्या या विमुक्तये। Education is One which liberates mind. A journey from Darkness to light. National Education Policy- 2020 is based on this principle.

Teaching profession is not a job, it is a responsibility. A schoolteacher accepts this responsibility by choosing the profession of 'Training Minds' of a human life.

School Education has structured plan to cater the need of young minds at each level. The curriculum refers to the lessons & educational content with learning objectives & outcome at each level to ensure over all development of child.

The curriculum envisages individual learning propensity and seeks to explore the potential of students in acquiring knowledge & skills. With greater orientation and research skills in core areas, students will evolve as judicious young adults with a sense of real self-estimate having true values & principles.

We, at Birla Shishu Vihar, are engrossed with commitment and passion to liberates young minds.

Thanks,
Sincerely Yours'

Pavan Vashishtha
Principal

International Dimension

Student Exchange

CBSE National Award

It was a moment of pride for BSV when one of its teachers, Mrs. Hema Joshi, PGT (Biology) was honored by our reverend, Principal Mr. Pavan Vashishtha for being selected for CBSE, National Award 2022, for her contribution in the field of education. The award will be conferred on her on 6th Aug. 22 at Vigyan Bhavan, Delhi by our Hon'able, Education Minister, Dharmendra Pradhan.

The Seven Day NCC Camp

The Seven days NCC Camp was held from 10 Aug 22 to 17 Aug 22 at Birla Hostel, Pilani under the guidance of commanding officer Mr. Arun Nayyar. It was a day -night camp. 22 cadets of Birla Shishu Vihar attended the camp with Caretaker Mrs. Sarita Sharma. Our students bagged 3rd position in Marching among five teams. In firing and shooting competition our 3 cadets qualified for the semifinals.

69th Annual Day Celebration

Science Week Celebration

Students of Birla Shishu Vihar win accolades at BET Pentangular 2022

"Intelligence, knowledge and experience are important and might get you a job, but strong communication skills are what will get you promoted."

It is with this objective of ensuring our students grow confident and communicate effectively, Birla Education Trust under the guidance of our visionary Director Maj. General S.S. Nair (AVSM, Retd.) organized English Pentangular on July 30, 2022 at Birla Balika Vidyapeeth. Post covid it was a significant move to return to normalcy, as all the seven schools under the Trust participated in both Open and Closed categories of the 4th edition of the event.

It was a roaring success for the students of Birla Shishu Vihar. Our students secured position in almost all the events in both categories. The hour of result declaration was the hour of elation for the Principal Mr. Pavan Vashishtha, Event Coordinator Mrs. Jyotsna Sharma and all the mentors Mr. Syama Datta, Mrs. Kalika Bhatia, Mrs. Rekha Sharma, Mrs. Pushpa Joshi, Mrs. Neetu Rathore & Mrs. Sangeeta Mishra as the auditorium kept buzzing with the name of Birla Shishu Vihar.

BSVians Earn Spotlight

Three girls of BSV participated in Inter-BET Swimming Competition for girls held at BBVP on 8th Aug.'22. Four schools of BET participated in this competition. Maitri of grade V bagged gold medal and Navya of class VIII bagged bronze medal in this competition.

Instilling the spirit of Patriotism

BET Inter-Institutional Patriotic Competition was held at BPS, Pilani on 13th August, 22. Thirty- four students of BSV participated in it. There were four categories: Two Senior (IX-XII) and two middle (VI-VIII). Middle group (Hindi song) bagged second position, Middle (Assamese song) was adjudged third and Senior (Hindi song) got third position.

Yoga Students Shine Again

Twelve students of BSV Participated in District Level Yoga Competition which was organized on 21 August:22 at R.D. Moyal Public School, Pilani. There were in toto 75 students from 7 different schools. Bsvians bagged three gold, three silver and two bronze medals for their outstanding performance in different categories. Result s are as follows:

Category	Name of student	Class	Position

Inter-BET Chess competition held at BSV, Multipurpose Hall

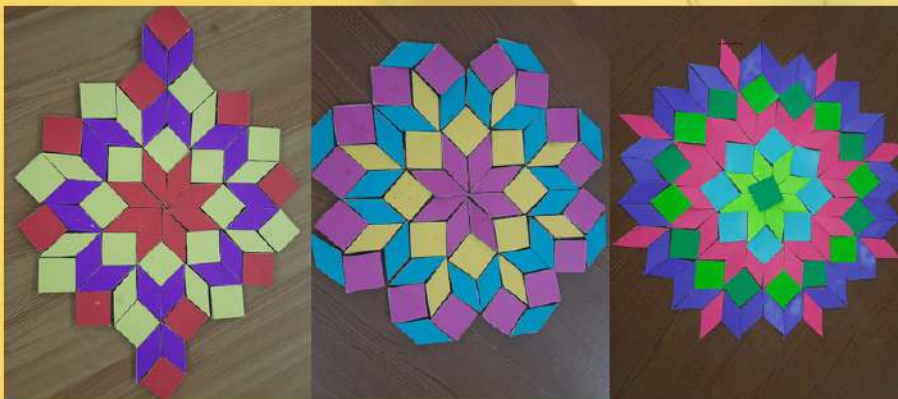

MUN Conference

Ten students from Birla Shishu Vihar Participated in Model United Nations, held at Birla School, Pilani. MUN, is an educational Simulation in which students can learn about diplomacy, International Relations, and the United Nations. At a MUN conference, students work as the representative of a country, organization, or person, and must solve a problem with other delegates from around the world. MUN teaches participants skills like Research, Public Speaking and Writing Skills, in addition to Critical thinking, Teamwork, and Collaboration. Model UN is meant to engage students, and allow them to develop deeper understanding into current world issues.

Making of Toran and Rangoli

Students of grade VIII explored Torans and Rangoli from the approach of Mathematics under the supervision of Mr. Sandeep Sharma and Mr. Narender and Mr. KK Agarwal. This activity took place in the Math lab where students, with the help of their teachers created multiple unique shapes and combined them together to make a toran and a rangoli.

(A) Oxford University is encouraging students to use the gender-neutral pronoun 'ze' instead of 'she' and 'he'.

Gender Equality

A right move for sure! Encouraging students to use gender-neutral pronouns can eradicate gender discrimination as common pronoun could prevent transgender students from feeling offended. It would also promote gender equality. So, educational institutes should adopt this change. (Shiksha X)

Use 'They' instead

Though 'ze' is a great substitute for the usual 'he/she'. It would be difficult pronouncing the words. I would prefer using 'they' rather than 'ze' as it is not only gender neutral but also a symbol of the specified people as a whole. This would minimize confusion and also boost gender-neutrality. (Bhavya)

It is Discriminating

I don't agree with this Idea as this is discrimination among genders. We won't know which sex gender we are talking about. 'SHE' should be proud of being a 'she' and 'HE' should be proud of being a 'he'. This doesn't mean that we shouldn't support gender equality. But if we change the so called pronouns used for gender then there won't be any gender category. (Jyotsna X)

Being Human Important

A great step towards respecting people's right to define themselves as neither male nor female. The decision is intended to diminish discrimination and prevent transgenders from being offended by the use of incorrect pronouns. It's not important who is a girl and who is a boy. The importance is in being human. This step will empower us to live in a fearless society and fight against all social evils. (Kanika X)

STUDENTS' CORNER

(B) CENTRAL BOARD OF SECONDARY EDUCATION'S three language formula is an added burden for students?

A different language is a different vision of life

It is a great decision by CBSE in favour of students. It is a golden opportunity for students. The students will get to know about the Indian culture more and connect students with their country . With languages you are at home anywhere. (Amitesh)

Benefit at all stages of life

I disagree with the above statement that it creates an additional burden on students, reason being language subjects are very easy to learn as compared to other subjects. Learning an additional language will benefit at all stages of life, helps us to interact with more people and the most important thing is that our career opportunities will increase. (Jayant)

An elective burden on students

Yet students focus on core subjects of the curriculum. So how will the students focus on three language formula? It is a heavy language burden. Yet students have phobia due to MATHS and now after this three language formula students will fear of study. Students will have a lack of knowledge in core subjects of curriculum due to this three language formula. (Kartik ;IX C)

Increase in the number of subjects

The proposal of the Central Board of Secondary Education (CBSE) to revert to the three-language system is likely to increase the burden on students. The return of the three-language format could further prove difficult for students as it increases the number of subjects from five to six. (Pulkit)

Learning another language is not only learning different words for the same thing, but another way to think about things.

This program could be a burden on student as they already have many subjects to study. It will make an increase in subjects that students studies and will increase the load of students. It might be displeasing for many students but it would also increase their knowledge and curiosity towards learning. It is truly said by Nelson Mandela "If you talk to a man in a language he understand, that goes in his head. If you talk to him in his language , that goes in his heart (Ishan)

STUDENTS' CORNER

Simplicity - Key To Happiness!

"Life is simple, we tend to make it complicated." If that is so, how do we make our life tough? Life is a journey that is to be enjoyed, we should make the best of it as long as we're alive. Instead, we burden ourselves a lot with unnecessary worries about how 'the tomorrow' is going to be and we 'expect' more from others, which in turn hurts us. Often, we've the wrong mindset, and expect others to accept it, which again gives rise to complications. We cry over our past, when we in fact know that, we can never change it. In short, we've complicated our life in infinite ways. We're never easily satisfied with 'enough', so we always yearn for more. We dream of those 'great' things tomorrow is going to bring to us, forgetting to enjoy the 'small' pleasures we can access today! These are very few of the many ways in which we overcomplicate our life. "Every drop makes an ocean." Every small thing you enjoy and care for eventually frames your path to happiness. Cherish every small happy memory and conversation. Stop dreaming of one big thing, and start enjoying a hundred small things that you have right away! Simplify your life by letting go of those things which don't really matter to you, but consume a lot of your time and energy. When you live a simple life, you begin to find more free time for yourself and your life starts to appear more stress-free. A simple life also contributes to a better well-being, and it removes most causes of worry in your life. Instead of surviving life with all those riches, just savour life with a sense of freedom- freedom from unnecessary materialistic wants - Rishabh Saxena

Are Boards Really Needed?

You enter class 10, everyone says that it's a board class. One year of hardwork and there you are. But who knows that Boards are kind off preliminary to class 11th and 12th. Now that there is CUET, is there any value left for board as there is no weightage given to it? Stream selection can be done in many other ways and not by testing a students intelligence. What do you guys think? There are pros and cons of everything - Shiksha Singh

STUDENTS' CORNER

Where has the humanity gone?

Here today we live in 21st century where technological advancement has reached great height. Recently, there was a road accident which was very dangerous. The victims were severely injured. The people around were busy recording the videos and clicking pictures of the incident.

How can humans today be so vicious? It is rightly said that humans are found everywhere but humans with humanity are rare! Yesterday, at morning, I was travelling by a city bus which was almost packed up by young students like me, people rushing to their jobs, etc. So even I didn't get a place to sit. There were hardly any seats left to sit, so most of the people were standing. On the next stop there entered an old couple. The sad thing was no one had the decency of getting up to make seat for the old couple. I was astonished to see that no one had the respect for the old couple. Moreover, the seats reserved for senior citizens were occupied by youngsters. The poor old couple had to travel standing the whole journey. Day by day we're adopting this ridiculous attitude which we think is 'all ok!' People in the bus had the attitude why should I get up, someone else will! It's high time to change our attitude from 'why me?' to 'why not me?' We're so much engrossed in our high tech gadgets that we don't know what's happening around. This attitude needs to be changed at the earliest. - Apoorv Singh

Six Things I Learnt Recently

In this write-up, I've listed the few things that I understood only by mere chance and observation. All the six statements are my own work, and they reflect what I've gone through in recent times.

1. It is not always that the best are recognized and rewarded, so don't let awards and titles delude you.
2. Common people are not the best ones, they can't always make wise choices and great decisions.
3. The most beautiful things in the world are often understood and acknowledged by our actions, and not always through words.
4. Those who're too good always appear a show-off to those who underperform.
5. With popularity comes negativity.
6. It's funny how much some people make out of something that is nothing. - Vatsal Trivedi

STUDENTS' CORNER

Be a responsible citizen

Do not wait for something big to happen start where you are with whatever you have said. People's president A.P.J Abdul Kalam .He believed in the power of the young minds to bring about change .Youngsters are a dynamic force .These days they are often exposed to issues such as economic iniquities, religious discrimination and environmental challenges. If young people age below 20 who constitute over 40% of the country's population develop skills such as empathy, teamwork, leadership and problem solving ,it will not only enable them to take responsibility for their actions but also helps to build a better future along with others

Develop a mindset that will push you to a question what is undesirable around you and resolve the problems efficiently and amicably by being a responsible citizen you can play an active part in society, be the change maker and also inspire others to bring about change in various walks of life.

- Deepender

Care for the environment

With a warming world staring us in the face, what can we do to minimise its impact on us and the future generations? remember the 3rs- reduce, recycle and reuse conserve energy by unplugging appliances when not in use. Conserve water by fixing the leaky taps in the kitchen and around your house. Plant saplings, and remember to water them regularly. they will surely provide the much-needed green cover in a few years' time. Cycle or walk to places in the vicinity instead of taking out your fuel guzzling 2-wheelers to buy things needed for home or to visit friends.in this way, you can reduce greenhouse gas emissions and thereby cut your carbon footprint. instead of going on accumulating new things, try recycling what you already have and reuse. Cardboards can be converted into penholders and made attractive with a coat of vibrant paint, cd discs can be converted into adornments, and doormats can be fashioned out of old clothes. The options are many, if you only put your heart to it. - Jaideep Sharma
